Linda:

We had scheduled 2 -3 pm. I apologize if I did not share that time with you. Will that work for you?

Our address is below, we are in the Fox Tower on Broadway. Please check in with the guard in the lobby. We have given them your name and they can help you get to our floor.

We plan on catching you up on our work efforts with Columbia River Basin Tribes.

Hi Marylou,
I sure am! What time would be best for you? I will be tied up until mid-morning on some deadlines.

Looking forward to meeting with you too!

Linda

Hi Linda:

I wanted to verify with you that you will be coming by tomorrow to meet with Amber and me.
We are looking forward to meeting with you.
Please let me know.
Thanks so much.

FW: Columbia River

Hi Mary Lou,

I saw your comments in an article (toxins rising up the food chain) I found while searching for information on pollution in the Columbia. I work with Indian Health Service in environmental health and am interested in working with the tribes along the Columbia to help them make healthy choices given the extent of the pollution.

Your comment is very true though, it is difficult to find any one source of information and I was also hoping you could direct me to any studies released concerning the Columbia River.

Also, it appears that the link below and the forwarded e-mail show some connection between the pollution and health effects through simple exposure to the water. Are you aware of any studies looking into this possibility?

<http://koin.com/Global/story.asp?s=6924334>

Thanks for any help you can provide!

Linda

Subject: Columbia River

I was not sure who to notify, so if this is not the appropriate e-mail address for the following, please direct me to whom I should provide this information to:

Some friends of mine have camped twice near the Columbia River in the campgrounds at Boardman, Oregon, in July and August 2007. They showed me where they have lost toe nails after swimming and boating in the Columbia River there. Several of the people they camped with experienced the same thing, along with windsurfers that they spoke to. Is anyone aware of this problem and looking into it? If needed, I can provide more detailed information and names of the people affected. Thank you.
